

Course Code: PART21-230

EASA Part 21 Subpart G & J

(Production and Design Organisations)

(Two Days)

INTRODUCTION

Under EASA regulations, companies are required to adopt common technical requirements and administrative procedures to ensure the airworthiness and environmental compatibility of aeronautical products, parts and appliances, subject to the basic Regulation; such requirements and procedures should specify the conditions to issue, maintain, amend, suspend or revoke the appropriate certificates.

Organisations involved in the design and production of products, parts and appliances should be required to comply with certain technical requirements in order to demonstrate their capability and means to discharge their obligations and associated privileges.

■ Synopsis

This course covers the regulations and requirements for Design Organisation Approval (DOA) and Production Organisation Approval (POA) according to EASA PART-21. The course covers both the theoretical aspects and as well as practical implementation to ensure productive and effective results. In addition, it is a platform for discussing problems and issues experienced in the working environment.

■ Course Objectives

The objectives of the course are as follows:

- To know the key points of Part 21 J & G.
- To integrate all the requirements of PART 21 J & G.
- To know how to navigate in the various texts and use the relevant information now and in the future.
- To understand the main principles of setting up Part 21 J & G approval within your organisation.
- To understand how Part 21 J & G are inter-linked with Part 145, 66 and 147 on the following :
 - applicability and eligibility
 - categories of certification and associated privileges
 - requirements in terms of basic knowledge
 - requirements in terms of experience
 - training and type and task rating
 - Registration and proof of the rating

■ Course Reference

This course is conducted with reference to the Basic EU Regulation (EC) 216/2008 and (EC) 1702/2003 EASA PART-21.
